Ocean did an EFR event in 2017 to address underground contamination, looks like USGC is pointing the mystery sheen at mayors point at Ocean.

Jed, I copied Ted Walden on this email. Ted Walden is our Regional FRP/SPCC Coordinator, he has been dealing with Ocean Petroleum.

Hi Jordan,

Out of curiosity, are any of the attached documents on the list a result of EPA enforcement at Ocean Petroleum (from 2016 or 2017)?USCG was asking. EPD should have a copy of all documents by next week, via CD.

Jed Hewitt

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon John and Jed,

We received historical environmental documentation from Ocean Petroleum (1025 bay Street Brunswick, GA). We would like to get your input on the material as there is a lot of technical analytical results from sampling events in 2016 and 2017. See attached for the index of what they provided us with. One of our questions now is what prompted the sampling events? (Whether that was triggered by a state or EPA inspection? Or both?) The file is rather large (unable to email it) so we have burned a CD for you. Our team plans to take a visit down to the area to check on the sheen, and the properties on Monday- 04 MAY . We would like to drop the CD off then as well. Please let me know what time would work for? Or if we can just leave it with the someone from the office. Thank you for all help!

Very respectfully,
LTJG Sheila Edwards
